

List of Accepted Papers

Paper ID	Title
3	Prediction of Crime Hot spot using Spatio-temporal Ordinary Kriging
14	Hadoop Based Architecture for Smart, Secure and Efficient Insurance Solution using IoT
15	Decision Tree Classifier for classification of proteins using Protein Data Bank
21	AN EFFICIENT OPTIMIZATION TECHNIQUE FOR SCHEDULING IN WIRELESS SENSOR NETWORKS: A SURVEY
23	Assessing Sentence Similarity through Lexical Analysis for Text Summarization Using Deep Learning.
24	Text to image encryption technique using RGB substitution and AES
30	A Secured Steganography Algorithm for Hiding Image in Image
32	FPGA implementation of High speed compact S-Box
34	Logit Based Artificial Bee Colony Optimization (LB-ABC) Approach for Dental Caries Classification Using Back Propagation Neural Network
38	A Hardware Implementation of Fractal Quadtree Compression for a Medical Image
39	Use of Modified Masood Score with Prediction of Dominant Features to Classify Breast Lesions
40	Extraction of Features from Video Files Using Different Image Algebraic Point Operations
44	Metaheuristic Based Virtual Machine Task Migration Technique for Load Balancing in Cloud
46	Heterogeneous Spectrum Sensing in Cognitive Radio Network using Enhanced Energy Detection and Matched Filter
48	A Genetic Based Distributed Stateless Group Key Management Scheme in Mobile Ad Hoc Networks

49	Analysis of Student Engagement and Course Completion in Massive Open Online Courses
50	Extended Conflict Based Search with Awareness
51	A Hybrid Approach for Traffic Delay Estimation
54	Design & Development of Internet of Things Based Body Mass Index Monitoring System
56	Parametric and Functional-based Analysis of Object Oriented Dynamic Coupling Metrics
57	Leveraging Trust Behaviour of users for Group Recommender Systems in Social Network
60	Digital Privacy and Data Security in Cloud based Services - A Call for Action
61	A review of Description Logic based Techniques for Robot Task Planning
62	Social Status computation for nodes of Overlapping Communities in Directed Signed Social Networks
65	Examination of Sense-Significance in Semantic Web Services Discovery
67	A Genetic Algorithm Approach to Context-aware recommendations based on Spatio-Temporal Aspects
69	Mobile Agent Based Improved Traffic Control System in VANET
72	Analyzing Applicability of Smartphone Sensors in Roadways Obstacles Identification in Infrastructure-less Environment using Soft Learning Approach
73	A Light Weight Cryptographic Solution for 6LoWPAN Protocol Stack
76	Design of Compact Multiband Annular Ring Slot Antenna
77	Multilayered Model of Soft Tissues for Surgery Simulation
78	Authentication using Dynamic Question Generation

84	Comparison of Software Testing Tools used in Embedded System Software development
85	Development of New Metaheuristic MPPT Algorithms for PV Systems in Varying Atmospheric Conditions
86	A Symbiosis Based Metaheuristics for Combinatorial Optimization in VLSI Floorplanning
89	A Novel Key Predistribution Scheme for Minimum Angle Routing in Wireless Sensor Network
90	Performance analysis of Software Defined Network with Three Controllers
97	Face Recognition based on SWT, DCT and LTP
98	An Intelligent algorithm for Joint Routing and Link Scheduling in AMI with Wireless Mesh Network
100	Throughput Optimization Methods for TDMA based Tactical Mobile Ad-Hoc Networks
101	Pseudo Hadamard Transformation based Image Encryption Scheme
102	Classification of Proteins using Naïve Bayes Classifier and Surface Invariant Coordinates
104	A Parallel Algorithm to hide an Image in Image for Secured Steganography
105	Distributed IoT and Applications: A Survey
107	A Vision-Based On-road Vehicle Light Detection using Support Vector Machines
109	Unraveling the challenges for the application of Fog Computing in different realms: A faceted study
110	DNA based XOR operation(DNAX) for Security of Data and DNA as storage medium
112	A Probe into the technological enablers of Microservice Architectures
113	Modeling of Data rate based Peripheral Security System in GNU radio

116	Medical Image Segmentation using GA based Modified Spatial FCM Clustering
117	A novel approach for community detection using Label Propagation Technique
118	Learner Level and Preference Prediction of E-Learners for E-Learning Recommender Systems
120	Selective video encryption based on entropy measure
122	Machine Learning Based Model for Identification of Syndromic Autism Spectrum Disorder
124	Smart Poster Implementation on Travel using NFC Tags
128	Augmenting cloud concepts learning with open source software environment
129	CBHiveQL: Context Based Hive Query Language for Large Data Analysis
130	Adiabatic SRAM Cell and Array
132	Enhancing students learning skills through Integrated Course Project Design Model(ICPDM)
136	Profiling of Hard Exudates and Microaneurysms to Evaluate the Progress of Diabetic Retinopathy
137	Improved Blurred Image Splicing Localization with KNN Matting
139	Single Image Super Resolution using Gradient And Texture Similarity
140	A Comparative Study on Prominent Strategies of Cluster Head Selection in Wireless Sensor Networks
141	An Unsupervised Approach for Moving Object Detection Using Distinction Features
143	Empirical Evaluation of Real-time Task-Priority Procedure on Small-Medium Scale Multicore Systems
144	A fast and efficient method for image splicing localization using BM3D noise estimation
147	A Single Image Haze Removal Method with improved Airlight Estimation using

	Gradient Thresholding
149	Predicting Survival of Communities in Social Network
150	An Effective Recursive Technique for Multi-class Classification and Regression for Imbalanced Data
151	A Novel Private Information Retrieval Technique for Private DNS Resolution
152	Support Vector Regression for Predicting Binding Affinity in Spinocerebellar Ataxia
153	Application of Swarm Intelligence in Autonomous Cars for Obstacle Avoidance
154	Home Automation using Hand Recognition for Visually challenged
155	SERVER COMMUNICATION REDUCTION FOR GPS BASED FLOATING CAR DATA TRAFFIC CONGESTION DETECTION METHOD
156	HDFS Logfile analysis using ElasticSearch LogStash and Kibana
157	Cost Effective Spectrometer using CMOS Sensor
159	Analysis of NSL-KDD Dataset using K-means and Canopy Clustering Algorithms Based on Distance Metrics
161	Canonical Correlation-based Feature Fusion Approach for Scene Classification
162	Random Seeding LFSR based TRNG for Hardware Security Applications
165	A Big Data Architecture for the Detection of Anomalies within Database Connection Logs
166	DEPLOYMENT BASED OPTIMIZER TECHNIQUE FOR LOCATION FIND OUT OF MOBILE NODES USING ANCHOR NODES
167	SENTIMENT EVALUATION FOR TEXT EXTRACTED FROM TWITTER
170	Big Data Security and Privacy: New Proposed Model of Big Data with Secured MR layer.
175	Rough K-means and Morphological Operation based Brain Tumor Extraction

176	Prediction of Different Types of Wine using Nonlinear and Probabilistic Classifiers
177	Improved k-anonymity Privacy Preserving Algorithm using Madhya Pradesh Election Commission Big Data
